

The Asset Tracking solution that meets real needs:

Easy to use • Complete • Affordable

AssetTraq™

What's where and who has it... **simply.**

Struggling to manage more equipment while meeting responsibilities for tracking safety and service information? Losing things or spending too much time finding them? Can't keep track of equipment on loan? Want to save time and reduce administration costs? Then you need AssetTraq! One of many innovative solutions from ASP – the trusted company that has been serving data technology needs since 1977.

Take a moment to consider the alternatives. The cost of fruitless searches for missing equipment, the expense of re-purchasing items you actually already own, but are "lost". The costs of pilfering if they think "no one cares". The ongoing cost of using an outside asset tracking service.

Easy to Use

Don't worry if you're inexperienced! AssetTraq is an easy to learn Windows program that uses the power of barcode identification to keep track of assets and their locations. Screen displays are simple and logical so that staff can easily teach themselves the program and friendly Telephone Support is only a call away. An Import Wizard allows existing asset data to be imported, saving re-typing. Periodic asset audits are a breeze, with a Portable Barcode Reader (just like stocktaking).

Complete

AssetTraq is a complete solution.

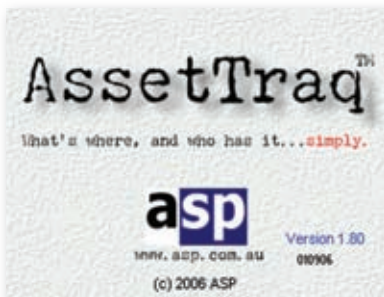

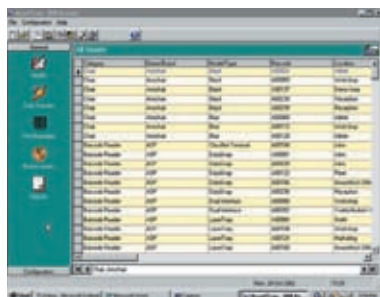

- Built in barcode printing (Label stock available through ASP)
- Asset loan tracking
- Data Import and Export Wizards
- Complete and flexible data fields, even photos
- Warranty and Safety Inspection tracking

Plus:

- Additional Seat Licences (same site) are available

"AssetTraq is the type of product that you usually only dream of. Absolutely exceptional!! It takes the hassle out of Stock-takes. They are now an easy task. It takes care of just about everything - except the walking. If the unthinkable happens and you need help the phone support is just as good. Well done guys, you are a credit to the industry, keep up the great work."
