

BHT 8000 Series

Portable, lightweight and easy to use

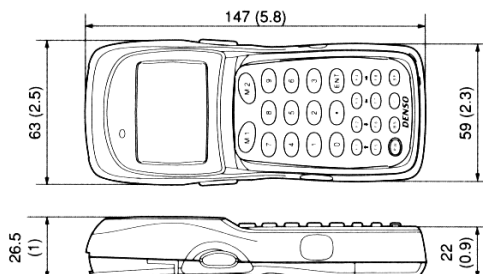

The **ASP BHT8000 Series** are rugged, reliable and compact Portable Barcode Readers. There are five models to choose from. Even the base model BHT8044 has a 4 Megabyte memory, and a scanning range from touching the barcode to a distance of 20cm from the reading window. The BHT8144 has the same performance, but with a slanted scan beam (to simplify shelf edge scanning). The BHT8044D extends the reading range to 40cm. 8 Megabytes of memory and the long scanning range are available with the BHT8048D and the BHT8048DB adds a Bluetooth radio transceiver.

With a weight of only 160g (including batteries), the ASP BHT8000 series are truly "pocketable". Powered by 2 x AAA alkaline cells, the units will run for 80 power on hours, or fit an optional NiMH rechargeable battery pack with 30 hours life.

Up and down load data with the optional ASP BHT Transfer Utility, via a rugged stereo jack type connector to the COM Port of a PC, or integrated IrDA compliant communication direct to a notebook PC, or optional charging or non charging Cradles. The Bluetooth BHT8048DB adds a 30m radio connection as a further option.

The large, easily read, 128 x 64 pixel LCD display can be backlit when needed, and the illuminated "moving key" keypad is both easy to use and allows various functions to be reassigned. For ease of use in noisy (or silent) surroundings, in addition to LED and beeping functions; the unit is thoughtfully equipped with a vibrate function to signal the user.

The unit is supplied with a manual specially written by ASP for the new user, and there are a selection of simple application programs available at no charge. For more demanding applications, there is an optional BASIC Compiler, and ASP offers full consult and program services wherever you are located.

- Small, light, power efficient
- Inbuilt linear imager distance Scanner with superb optics
- Up to 8 Meg memory
- RS232, IrDA, Bluetooth
- Reads all common barcodes
- 128 x 64 Graphics Display
- Durable resin keys
- Vibrate function
- Programmable, suits a range of applications
- Quality Japanese construction
