Options	ASP Programmers Pak, Cables, Leather Case, Clock/Calendar module, Modem extensions
Dimensions	188mm (L) x 94mm (W) x 57mm (H)

The Z4 DataTraq™ is the latest generation of ASP's popular Portable Barcode Reader, retaining the previous model's ability to operate as a fixed reader and a portable, but now adding the programming power of ASP BASIC™.

From the moment you turn it on, the Z4 DataTraq is ready to begin scanning barcodes. Optionally you can let a program written in the powerful in-built ASP BASIC language guide operators through their tasks, making it even easier. At any time the Z4 DataTraq is easily disconnected for portable use.

With big keys and a large, friendly clear display you always know what's going on. In harsh environments, a tailored leather case is available to further protect the unit. In fixed use an automatic audit trail of scans is stored.

You can match the performance of the Z4 DataTraq to your needs by choosing the most appropriate scanner. Plug in either the ASP Barcode Zapper™ or QS6000+ laser Scanner (ASP or your dealer will be happy to advise you on the most appropriate choice for your needs).

With USB, PS/2 and RS232 / RS232 Wedge interfaces available, the Z4 DataTraq connects to practically anything. While connected to the homebase, the inbuilt batteries are automatically recharged.

ASP's AssetTraq™ Assets Management Program has been designed to be used with the Z4 DataTraq. A full version of the program is available at www.asp.com.au/assettraq.html.

The Z4 DataTraq comes with a two year warranty, the Barcode Zapper comes with a three year warranty (12 months on cable), and both are certified under Australia's Radio Frequency Emission Testing Standard (C-Tick).

Leather Case and strap

USB Homebase

Barcode Zapper

- Perfectly suited to retail and general purpose applications. For libraries, it reads ISBN/SCIS and 13 digit ISBN
- Power and versatility at a sharp price
- Manufactured in Australia
- Multiple interface options
- Automatic recharging
- Free programs available – visit www.asp.com.au/downloads.html
