## Supercharge Retail Manager with RetailMAX

### Like to dramatically speed stocktakes for your Retail Manager POS system?

Retail Max supercharges your *MYOB Retail Manager* at stocktaking time.

You could continue printing out your entire stock file, then marking quantities on the printout, then entering these figures into your Stock screen and then printing your variance report... Doesn't sound like much fun though.

Or you could work smart and invest in ASP's RetailMAX package of simple to use software and compact Portable Barcode Reader.

To use, instantly load your stock file from *Retail Manager* (barcode and description) into the Portable, then scan the barcodes on stock in any order. Items scanned are verified as existing in your stock list and their descriptions displayed. Then just type in the quantity.

The Portable Reader won't lose any data, it's safely stored in backed up memory. Once the stocktake is finished, use RetailMAX to load the results directly into the Stock screen of *Retail Manager* in seconds, ready for a variance report.

Is this process faster, more accurate, less frustrating, and will it save you money? **YES!**

The RetailMAX package comes with a manual, software on CD, and an ASP BHT8044 Portable Barcode Reader complete with alkaline batteries and PC cable. There are options such as rechargeable batteries and download cradles, but the standard package will normally be all you need. ASP friendly staff will be pleased to advise on special needs.

The ASP BHT8044 is around the size of a mobile phone, Japanese quality built, and runs for up to 80 hours on 2 AAA alkaline cells! You'll love it!

The ASP BHT8044 has a clear LCD screen, clear keypad, suits left and right handers, and scans barcodes at a distance.

### TOTAL INVESTMENT

(Software, BHT8044 Integrated Portable Barcode Reader, RS232 Download Cable & Alkaline Batteries)

**\$1,565** plus \$15 Freight and GST
