

Security Labels

Secure valuable assets and deter theft with Security Labels!

Created with a destructible material that when removed tears apart. These **Security Labels** offer customers a unique way to protect their assets.

The label coating featured on these labels not only aids in the destruction of the label but also protects the barcode and/or copy from cleaning products as well as mild abrasion. Adding a barcode and/or human readable number to the label allows the customer to use it as part of an overall asset tracking system. Available with optional barcode, these **Security Labels** are produced using our digital printing process which allows for detailed logos to be produced in an unlimited selection of colours including standard colours (black, red, yellow, green and blue), four-color process and PMS spot colours.

Test Results

These tests were conducted for a limited period of time in strict laboratory conditions. In order to achieve maximum satisfaction we highly recommend that any customer considering use of this product test the labels in the environment in which they will be used.

Barcode Readability Test: This rating measures barcode readability after being exposed to chemicals listed below for a 2 hour soak.

Test Conditions	Rating
Acetone	15
Isopropyl Alcohol	90
Speedball Power Cleaner	100
Glass Cleaner	100
Water	100

Chemical emergence tests are rated on a scale of 100 to 0:

- 100 = No Effect
- 75 = Image Blurred
- 50 = Image Scratches Off
- 25 = Image Wipes Off
- 0 = Image Destroyed

SPECIFICATIONS

Material	0.05mm destructible vinyl that can withstand temperatures up to 93°C for short durations.
Serialisation	Barcode and human readable equivalent is produced using the latest high resolution digital technology available, which provides excellent clarity and easy scanning Code 39 is the standard symbology with a range of 2.7 to 9.4 CPI (characters per inch). <i>Optional symbology</i> include Code 128, 12 of 5, 2D Data Matrix and QR Code.
